

Java Test

- 1) Array question → ~~set~~ contains is not there in Array.
- 2) how to retrieve stream?
- 3) pom.xml contains? scope, version, artifactId, groupId
- 4) Annotation which executes after ^{all} test method: @AfterAll.
executes after each test method: @After
- 5) assertEquals(Boolean Expected, Boolean Actual)
if Array is given, then assertEquals(Array, expected, actual)
- 6) Prepared Statement Question. (opt a & c)
- 7) import statement for SQL → java.sql.
- 8) which keyword is used to declare a variable as constant?
- 9) Reference ^(::) is used for which method, in java?
↳ Constructor, ~~or~~ instance., static
- 10) Default location of maven repository → \$user/.m2/repository
- 11) Hash code returns 'int'
- 12) A company / printer question → ~~inheritance~~ Tight coupling, low cohesion.
- 13) Duplicate keys → ArrayList, LinkedList.
- 14) ~~jdbc~~ ^{jdbc} question → getConnection()
- 15) compareTo(Object o) { } ← code based question.
- 16) Comparable, comparator (multiple option)
- 17) TreeMap question → { Bhutan, China, India, Nepal }
- 18) Duplicate & Natural order → HashSet
- 19) Finally question →
- 20) Tight coupling, low cohesion.
- 21) which is not included in exception handling?
→ exception, access.
- 22) User defined exception is which type of exception
↳ checked exception.
- 23) Interface method cannot be → final.
- 24) Cat is a jumper, dog is an animal, beagles is a tall.

25) old project, new project → option is 'both are aiming at different objects.'

26) Class {

int i = 9;

public static void main(String[] args){

int i = 10;

}

option: ~~to compile time error~~ '10' '9'

27) Signature question:

28) do while 'y' question → error

29) Sequence: private → default → protected → public

30) Primitive to wrapper class automatically → autoboxing.

31) ~~Interp~~ Used to declare constant variable in Java.

a) Static b) Enum c) Final & Static d) Final e) Const

32) int arr[] = {55, 12, 34, 56, 100, 101, 102, 103, 104, 101, 110, 111};

Collections <Integer> collection = Arrays.asList(arr);

System.out.println(collection.size());

Stream <Integer> stream = collection.stream().distinct();

33) (::) Reference is used in static, instance of, constructor [except private]

34) @Ignore → not there in java.
